

Coronavirus (Covid-19) Going for a virus test

Coronavirus is sometimes called Covid-19

It can affect your lungs and your airways.
Most people who get the virus will not be very ill.
Some older people or people who already have health problems may become more ill.

If you get this virus

- you might have a cough
- a sore throat
- a high temperature

If you have symptoms
You might need to get a test

The test will tell the doctors if you have the virus

You might have to travel to get the test
You might have to wait for your turn

The test is quick

Its ok to be worried about the test.

The test has 2 parts:

The first part is the nose test.

The staff will take a cotton swab

They will tell you to tip your head back

They will put the cotton swab in your nose

It has to go up your nose

It may feel strange but does not hurt

Try to stay still

It is over quickly

Remember this will help you to stay safe

The test has 2 parts:

The second part is the throat test.

The nurse will take a different cotton swab

She will tell you to open your mouth wide

She will put the swab in your throat and move it around

It does not hurt, but it can feel strange

Try to stay still

It is over quickly

Tell the nurse if you feel like you are going to be sick.

After the test you can relax

You can be proud that you have been brave

You have to wait to find out if you have the virus

This is ok.

The staff will tell you what is going to happen next.

If you are worried you can speak to your family, carers or staff that support you.

It is ok to be worried
but the staff can help
